

# INDEX

## RUBBER CHEMISTRY AND TECHNOLOGY VOLUME XXV, 1952

### AUTHOR INDEX

Page	Page
ADAMS, J. W., REYNOLDS, J. A., MESSER, W. E., AND HOWLAND, L. H. Abrasion resistance of GR-S vulcanizates.....	191
ADAMS, S. R. See SHAW, R. F.	
ALLISON, A. R., AND STANLEY, I. J. Ozone deterioration of elastomeric materials. Preliminary results of a study by infrared spectroscopy.....	908
AMERONGEN, G. J. VAN. Chlorinated rubber from latex.....	609
ANDREWS, R. D. Correlation of dynamic and static measurements of rubber-like materials.....	730
ANTHONY, ROBERT L. See WITTE, ROBERT S.	
ARNOLD, AURELIA, MADORSKY, IRVING, AND WOOD, LAWRENCE A. Measurement of refractive index of elastomers.....	693
BAKER, R. H. See THOMPSON, D. C.	
BARTLE, A. W., AND TEMPLE, J. W. Ozone in Los Angeles and surrounding areas.....	945
BATEMAN, L., AND GEE, G. Determination of absolute rate constants for olefinic oxidations by measurement of photochemical pre- and after effects. I. At "high" oxygen pressures.....	15
BEATTY, J. R. Test for crystallization effects in rubbers.....	689
BEKKEDHAL, NORMAN. See FANNING, RACHEL J.	
BELITSKAYA, R. M. See KUZMINSKII, A. S.	
BELMAR, ROBERT. Contribution to the physical chemistry of Hevea latex. I. Metal cations in latex.....	124
II. Adsorption of metallic cations on the surface of latex particles.....	132
BLOKH, G. A. See KUL'BERG, L. M.	
BISCHOFF, J., CATSIFF, E., AND TOBOLSKY, A. V. Elastoviscous properties of amorphous polymers in the transition region. I.....	751
BLACKWELL, R. F. Quantitative characterization of cure. I. Relationship between modulus and strain of pure-gum natural-rubber vulcanizates.....	430
—, FLETCHER, W. P., AND GEE, GEORGE. Quantitative characterization of cure. III. Relation between compound viscosity and vulcanizate stiffness of pure-gum natural-rubber vulcanizates.....	446
BLANCHARD, A. F., AND PARKINSON, D. Breakage of carbon-rubber networks by applied stress.....	808
BLEARD, ROBERT, B. Viscoelasticity of rubber.....	490
BLOKH, G. A. See KUL'BERG, L. M.	
BOLT, THOMAS D. See STECHERT, DIETRICH G.	
BORROFF, E. M., ELLIOTT, R., AND WAKE, W. C. Effect of speed of stripping on the measured adhesion between conveyor-belt plies.....	391
BOWLER, WILLIAM W. Water vapor permeability and sorption of Hevea latex films.....	1006
BROWNLOW, R. W. See THOMPSON, D. C.	
BURST, J. M. Abrasion and wear of rubber. Analysis of wear curves.....	107
— AND WILLIAMS, G. E. Belt-flexing test of the du Pont type.....	110
BURMISTROV, S. I. Qualitative analysis of rubber mixtures. II.....	157
CASSAGNE, PAUL. Heat sensitivity of Hevea latex. I. Action of complex zinc-ammonium complexes.....	303
II. Process of heat sensitization of degraded latex.....	309
CATRIFF, E. See BISCHOFF, J.	
CHARSET, R. See THIRION, P.	
CLARKE, FREDERICK E. See GOWANS, WILLIAM J.	
COLEMAN, R. J. See PIERSON, R. M.	
CODRINGTON, R. S. See HOLROYD, L. V.	
COLLIER, H. M. See MADGE, E. W.	
COTTON, F. H., AND LEE, K. O. Effect of storage of milled rubber on its molecular weight.....	71
Effects of antioxidants on the rate of breakdown of rubber during mastication.....	287
CRANTREE, J., AND ERICKSON, R. H. Atmospheric ozone. A simple approximate method of measurement.....	700
CUTHBERTSON, G. R., AND DUNNOM, D. D. Cracking of rubber and GR-S in ozone. Effects of temperature and elongation.....	878
DAHLQUIST, C. A., HENDRICKS, J. O., AND TAYLOR, N. W. Elasticity of soft polymers. Constant-stress elongation tests.....	56
DANNENBERG, E. M. Carbon black dispersion and reinforcement.....	843
DELALANDE, ANDRÉ. Action of unsaturated compounds on natural rubber in solution. I. The reaction catalyzed by a peroxide....	74
II. The reaction induced by heat alone....	275
DELATTRE, ROBERT. Heat sensitization of latex by the zinc salt of mercaptobenzo-thiazole.....	621
D'IANI, J. D. See PIERSON, R. M.	
DOGADEIN, B. A., AND SANDOMIRSKII, D. M. Effect of temperature and rate of stretching on the tensile strength of vulcanizates.....	50
D'OR, L., AND KÖSSLER, I. Infrared spectro-metric study of the oxidation of natural rubber.....	251
DUCKWORTH, F. H. See MADGE, E. W.	
DUKE, JUNE, TAIT, W. K., AND KOLTHOFF, I. M. Formation of bound rubber of GR-S type polymers with carbon blacks.....	500
DUNNOM, D. D. See CUTHBERTSON, G. R.	
ELLIOTT, R. See BORROFF, E. M.	
ERICKSON, R. H. See CRANTREE, J.	
EYE, B. J. VAN. See SALOMON, G.	
FACKLER, MARION B., AND RUOG, JOHN S. Migration of materials during accelerated aging by the oxygen pressure method....	331
FANNING, RACHEL J., AND BEKKEDHAL, NORMAN. Quantitative determination of natural-rubber hydrocarbon by refractive index measurements.....	680

	Page		Page
FERRY, JOHN D., FITZGERALD, EDWIN R., GRANDINE, LESTER D., JR., AND WILLIAMS, MALCOLM L. Temperature dependence of dynamic properties of elastomers. Relaxation distributions.....	720	KETELAAR, J. A. A. R. See SALOMON, G.	
FITZGERALD, W. P., GEE, GEOFFREY, AND MORRELL, S. H. Quantitative characterization of cure. II. Use of modulus as a measure of the state of cure of pure-gum natural-rubber vulcanizates....	439	KIRSHENBAUM, A. D., HOFFMAN, C. W., AND GROSSE, A. V. Autoradiographic technique with carbon <sup>14</sup> in rubber.....	291
FLETCHER, W. P. See BLACKWELL, R. F.		KÖSSLER, J. See D'OR, L.	
FORD, F. P., AND GESSLER, A. M. Properties of Butyl rubber-carbon black systems....	858	KOLTHOFF, I. M. See DUKE, JUNE.	
FOXTON, R. N. See GALLOWAY, P. D.		KONINGSBERGER, C. See SALOMON, G.	
FREY, HORST. Determination of free sulfur in vulcanized rubber mixtures.....	365	KRAAY, G. M., AND TEMPEL, M. VAN DEN. Mechanism of the gelling of Hevea latex by zinc compounds.....	995
Determination of total sulfur in vulcanized rubber.....	371	KUL'BERG, L. M., BLOKH, G. A., AND GOLYBKOVA, E. A. Application of drop analysis to the detection of compounding ingredients in rubber mixtures. II....	152
FRIEDRICH, RALPH E. See JONES, GIFFIN D.		KUZMINSKIĖ, A. S. See POSTOVSKAYA, A. F.	
GALLOWAY, P. D., AND FOXTON, R. N. Detection of elemental sulfur in minute quantities as in "blooms".....	959	— AND LYUBCHANSKAYA, L. I. Changes of the mechanical properties of vulcanizates during the early stages of thermal oxidation.....	801
GALPERINA, F. I. Estimation of the technological properties of rubber mixtures by their fluidity.....	339	— SHANIN, L. L., AND LEZHNEV, N. N. Diffusion of oxygen and oxidation of rubber in the presence of phenyl- $\beta$ -naphthylamine.....	230
GEE, GEOFFREY, AND MORRELL, S. H. Quantitative characterization of cure. IV. Definition and measurement of rate of cure for pure-gum natural-rubber compounds. See BATEMAN, L., BLACKWELL, R. F., AND FLETCHER, W. P.	454	— SHOKHIN, I. A., AND BELITSKAYA, R. M. Nature of structural changes in butadiene rubbers caused by high temperatures (100–200° C).....	33

SUBJECT INDEX

Abrasion resistance of GR-S vulcanizates.....	191	Aging accelerated, migration of materials during..	321
and wear of rubber. Analysis of wear curves.....	107	GR-S, in solution.....	40
Absorption by carbon black, influence on oxidation of unvulcanized cold rubber..	557	resistance of rubber vulcanizates.....	350
Accelerators, influence of, on determination of free sulfur.....	956	tests for rubber, nondestructive.....	751
Action of light on sodium-butadiene rubber.....	872	Amorphous polymers in the transition region.	751
of unsaturated compounds on natural rub- ber in solution. I. The reaction catalyzed by a peroxide.....	74	Analysis infrared, of rubber derivatives.....	265
II. The reaction induced by heat alone.	275	qualitative, of rubber mixtures.....	157
Adhesion, measured, effect of speed of strip- ping on.....	391	of wear curves of rubber.....	107
Adsorption of metal cations on surface of la- tex particles.....	132	of vulcanized rubbers. Influence of ac- celerators on the determination of free sulfur by the copper spiral method.....	956
		Anisotropy, diamagnetic, of natural and syn- thetic rubbers.....	759
		Antioxidants, effects of, on rate of breakdown of rubber during mastication.....	287

	Page		Page
Apparatus for determining moisture in rubber.....	704	Determination	
Application		of absolute rate constants for organic oxidations by measurement of photochemical pre- and after-effects. I. At "high" oxygen pressures.....	15
of drop analysis to the detection of compounding ingredients in rubber mixtures. II.....	152	of rubber hydrocarbon by a modified bromination method.....	961
of the measurement of the dielectric constant and loss angle to the study of the structure of vulcanizates loaded with carbon blacks.....	533	of free sulfur in vulcanizates by a polarographic method.....	161
of polarized infrared radiation to problems in molecular structure. I. Polyisoprenes.....	480	in vulcanized rubber mixtures.....	365
Atmospheric ozone. A simple approximate method of measurement.....	700	of total sulfur in vulcanized rubber.....	371
Automotive compounds, testing of.....	885	Diamagnetic anisotropy of natural and synthetic rubbers.....	759
Automoradiographic technique with carbon <sup>14</sup> in rubber.....	291	Dielectric constant, measurement of.....	533
Bases, organic, effect on viscosity lowering of rubber solutions.....	234	Diffusion of oxygen and oxidation of rubber in the presence of phenyl- $\beta$ -naphthylamine.....	230
Belt-flexing test of the du Pont type.....	110	Dilatometric measurement of the rate of vulcanization of crepe rubber by sulfur monochloride.....	48
Beltung, conveyor, plies.....	391	Dispersion of carbon black.....	843
Blooms, detection of elemental sulfur, as in.....	959	Drop analysis of the detection of ingredients in rubber mixtures.....	152
Bound rubber of GR-S type.....	500	Du Pont type belt flexing test.....	110
Breakage of carbon-rubber networks by applied stress.....	808	Dynamic	
Breakdown of rubber during mastication.....	287	properties, temperature dependence.....	720
Bromination, method for determination, rubber hydrocarbon.....	961	and static measurements of rubberlike materials.....	730
Butadiene rubbers, nature of structural changes in.....	33	Ebonite, surface deterioration of.....	176
Butyl rubber-carbon black systems.....	858	Effect	
Carbon		of antioxidants on the rate of breakdown of rubber during mastication.....	287
black		of speed of stripping on the measured adhesion between conveyor-beltng plies.....	391
adsorption by.....	557	of storage of milled rubber on its molecular weight.....	71
dispersion and reinforcement.....	843	of temperature and rate of stretching on the tensile strength of vulcanizates.....	50
systems, Butyl rubber.....	858	Elasticity of soft polymers. Constant-stress elongation tests.....	56
blacks		Elastoviscous properties of amorphous polymers in the transition region. I.....	751
bound rubber of GR-S type polymers with.....	500	Elongation tests, constant-stress.....	56
structure of vulcanizates loaded with.....	533	Estimation of the technological properties of rubber mixtures by their fluidity.....	339
rubber networks, breakage of, by applied stress.....	808	Evaluating dynamic fatigue of adhesion of tire cords to rubber stocks.....	669
Carbon <sup>14</sup>		Evaluation	
in rubber, audiographic technique with.....	291	of tread wear.....	321
Cations		of the vulcanization characteristics of crude rubber.....	99
metal, in latex.....	124	Exposure, static, testing of automotive compounds.....	669
metallic, absorption of.....	132	Fatigue, dynamic, evaluating of tire cords.....	669
Changes of the mechanical properties of vulcanizates during the early states of thermal oxidation.....	801	Films from mixtures of natural and synthetic rubber latex. Physical properties.....	938
Chemical constitution and deactivating effect		Flexing, belt-, test of du Pont type.....	110
chlorinated rubber from latex.....	609	Fluidity estimation of technological properties of rubber mixtures.....	339
cold rubber, oxidation of unvulcanized.....	557	Formation of bound rubber of GR-S type polymers with carbon blacks.....	972
Contribution to the physical chemistry of Hevea latex.....		Free sulfur	
I. Metal cations in latex.....	124	determination of, by copper spiral method.....	956
II. Adsorption of metallic cations on the surface of latex particles.....	132	in vulcanized rubber mixtures.....	365
Correlation of dynamic and static measurements of rubberlike materials.....	730	in vulcanizates.....	161
Crack-depth, ozone, for rubber.....	920	Gelation of latexes.....	596
Cracking of rubber and GR-S in ozone. Effects of temperature and elongation.....	878	Gelling of Hevea latex, mechanism of.....	995
Cure, quantitative characterization of.....	430	Globules, rubber, in Hevea latex.....	315
Crystallization		GR-S	
effects in rubbers.....	689	aging in solution.....	89
of vulcanized rubber at low temperatures.....	397	cracking in ozone.....	878
Cyclization, statistical kinetics of Hevea rubber.....	784	latexes in foam rubber.....	972
Deactivating effect, chemical constitution and		rubber compounds, storage stability of.....	651
degraded latex, heat sensitization of.....	309	some structural units of.....	21
Derivatives, infrared analysis of rubber.....	265	type polymers with carbon blacks.....	500
Detection of compounding ingredients in rubber mixtures.....	152	Halides, organic, kinetic analysis of.....	573
Deterioration		Hardness testing, improvements in accuracy in.....	375
ozone, of elastomeric materials.....	908		
of rubber under the influence of light and dry and moist heat.....	166		

	Page		Page
Heat		Migration of materials during accelerated aging by the oxygen pressure method. . . . .	331
moist, deterioration of rubber under influence of. . . . .	166	Modulus	
reaction induced by. . . . .	275	as a measure of state of cure. . . . .	439
reversion of vulcanized rubber. . . . .	241	and relaxation of elastomers in torsion at low temperatures. . . . .	412
sensitivity of Hevea latex. I. Action of complex zinc-ammonium complexes. . . . .	303	and strain of vulcanization. . . . .	430
II. Process of heat sensitization of degraded latex. . . . .	309	Moisture in rubber, apparatus for determining	704
sensitization of latex by the zinc salt of mercaptobenzoethiazole. . . . .	621	Molecular	
Hydrocarbon, rubber		structure and properties of rubber. . . . .	12
determination of. . . . .	961	weight, effect of storage of rubber on. . . . .	71
quantitative determination of. . . . .	680	Nature of structural changes in butadiene rubbers caused by high temperatures. . . . .	33
Identification of accelerators and antioxidants in vulcanizates by infrared spectroscopy. . . . .	350	Neoprene vulcanizates, ozone resistance of. . . . .	928
Improved apparatus for determining moisture in rubber by distillation with toluene	704	Networks, carbon-rubber, breakage of. . . . .	808
Improvements in accuracy of hardness testing. . . . .	375	Nitrile compounds, storage stability of. . . . .	651
Infrared		Nondestructive aging tests for rubber. . . . .	342
analysis of rubber derivatives. . . . .	265	Nuclear magnetic resonance study of transitions in polymers. . . . .	767
radiation, polarized. . . . .	480	Olefinic oxidations, rate constants for. . . . .	15
spectrometric study of the oxidation of natural rubber. . . . .	251	Olefins, oxidation of. . . . .	21
spectroscopy, study of ozone deterioration of elastomeric materials. . . . .	908	Oxidation	
Ingredients, compounding, detection of, in rubber mixtures. . . . .	152	of natural rubber, infrared spectrometric study of. . . . .	258
Investigations of the reversion of vulcanized rubber under heat. . . . .	241	of olefins representing some structural units of GR-S. . . . .	21
Kinetic analysis of organic halides. IV. Analysis of macromolecular polyhalides. . . . .	573	olefinic. . . . .	15
Kinetics and mechanism of accelerated sulfur vulcanization. . . . .	1	of rubber in presence of phenyl- $\beta$ -naphthylamine. . . . .	230
statistical, of Hevea rubber cyclization. . . . .	784	thermal, mechanical properties of vulcanizates during. . . . .	801
Latex		of unvulcanized cold rubber. Influence of adsorption by carbon black. . . . .	557
chlorinated rubber from. . . . .	609	Oxygen	
films from mixtures of natural and synthetic rubber. . . . .	938	diffusion of, in presence of phenyl- $\beta$ -naphthylamine. . . . .	230
gelation of. . . . .	596	pressure method, aging by. . . . .	331
GR-S, in foam rubber. . . . .	972	Ozone	
heat sensitization of. . . . .	621	atmospheric, method of measurement by. . . . .	700
Hevea		crack-depth for rubber. . . . .	920
gelling of. . . . .	995	cracking of rubber and GR-S in. . . . .	878
heat sensitivity of. . . . .	307	deterioration of elastomeric materials. Preliminary results of a study by infrared spectroscopy. . . . .	908
mechanical stability testing. . . . .	630	in Los Angeles and surrounding areas. . . . .	945
physico-chemical study of. . . . .	312	resistance of Neoprene vulcanizates. Effect of compounding ingredients. . . . .	928
rubber globules, particle size of. . . . .	315	Particle size of rubber globules in Hevea latex. . . . .	315
water vapor, permeability of. . . . .	1106	Permeability, water vapor, of Hevea latex films. . . . .	1106
zinc oxide stability of. . . . .	641	Peroxide, reaction catalyzed by. . . . .	74
Light		Phenyl- $\beta$ -naphthylamine, oxidation of rubber in presence of. . . . .	230
action of, on sodium-butadiene rubber. . . . .	872	Photochemical pre- and after-effects of olefinic oxidations. . . . .	15
deterioration of rubber under influence of. . . . .	167	Plastometers, rotation, temperature rise in rubber. . . . .	387
Los Angeles, ozone in. . . . .	945	Polarographic method for determination of free sulfur. . . . .	161
Loss angle, dielectric constant and. . . . .	533	Polyacrylic rubber, vulcanization and structure of. . . . .	582
Low-temperature behavior of elastomeric compositions. . . . .	140	Polyhalides, macromolecular analysis of. . . . .	573
Low temperatures		Polyisoprenes. . . . .	480
crystallization of vulcanized rubber at. . . . .	397	Properties of Butyl rubber-carbon black systems. . . . .	858
torsion at. . . . .	412	Qualitative analysis of rubber mixtures. II. Quantitative characterization of cure. . . . .	157
Magnetic resonance, nuclear, study of transitions in polymers. . . . .	767	I. Relationship between modulus and strain of pure-gum natural-rubber vulcanizates. . . . .	430
Mastication		II. Use of modulus as a measure of the state of cure of pure-gum natural-rubber vulcanizates. . . . .	439
breakdown of rubber during. . . . .	287	III. Relation between compounds viscosity and vulcanizate stiffness of pure-gum natural-rubber vulcanizates. . . . .	446
of rubber, mechanism of. . . . .	234	IV. Definition and measurement of rate of cure for pure-gum natural-rubber compounds. . . . .	454
Measurement of refractive index of elastomers	693		
Mechanical			
properties of vulcanizates during thermal oxidation. . . . .	801		
stability testing of Hevea latex. . . . .	630		
Mechanism			
of accelerated sulfur vulcanization. . . . .	1		
of gelation of latexes. . . . .	596		
of the gelling of Hevea latex by zinc compounds. . . . .	995		
of surface deterioration of ebonite. . . . .	176		
Mercaptobenzoethiazole, zinc salt of. . . . .	621		
Metal cations in latex. . . . .	124		

	Page		Page
determination of natural rubber hydrocarbon by refractive index measurements	680	Study of the mechanism of mastication of rubber. III. Mutual effects of organic bases and softeners on the viscosity lowering of rubber solutions	234
Rate		of surface deterioration of ebonite, and of means of preventing deterioration	176
constants for olefinic oxidations	15	Sulfur	
of cure for pure-gum compounds	454	chloride, vulcanization of crepe rubber by	48
of stretching on tensile strength, effect of	50	elemental	959
of vulcanization of crepe rubber	48	free	
Refractive index		determination of	956
of elastomers	693	in vulcanizates	161
measurements of natural rubber hydrocarbon	680	in vulcanized rubber mixtures	365
Reinforcement of carbon black	843	total, in vulcanized rubber	371
Relation between stress relaxation and aging resistance of rubber vulcanizates. Some preliminary investigations	40	Surface deterioration of ebonite	176
Relaxation		Technological properties of rubber mixtures	339
distributions	720	Temperature	
of elastomers in torsion at low temperatures	412	dependence of dynamic properties of elastomers. Relaxation distributions	720
stress, and aging resistance	40	effect of, on tensile strength	50
Resonance, nuclear magnetic, study of transitions in polymers	767	retraction test for characterizing low-temperature behavior of elastomeric compositions	140
Retraction, temperature, test	140	rise in the rubber in rotation plastometers	387
Reversion of vulcanized rubber under heat	241	stress, studies in rubber	468
Road wear of tires	656	Tensile strength of vulcanizates	50
Sensitivity, heat of Hevea latex	303	Test for crystallization effects in rubbers	689
Sensitization, heat of, of degraded latex	309	Tire cords, dynamic fatigue of adhesion of	669
Sodium-butadiene rubber, action of light on	872	Tires, road wear of	656
Softeners effect of, on viscosity lowering of rubber solutions	234	Torsion at low temperatures	412
Solution		T-R (temperature retraction) test for characterizing the low-temperature behavior of elastomeric compositions	140
action of unsaturated compounds on natural-rubber	275	Transition region, amorphous polymers in the	751
natural rubber in, effect of unsaturated compounds on	74	Transitions	
rubber, viscosity lowering of	234	in polymers, nuclear magnetic resonance study of	767
Some factors influencing the road wear of tires	656	stress-temperature studies	468
Sorption of Hevea latex films	1106	Transmission of mechanical vibrations through rubbers	517
Spectrometric, infrared, of oxidation of natural rubber	258	Tread	
Spectroscopy, infrared	656	stocks, vibration characteristics	711
Stability		wear, evaluation of	321
of latex, zinc oxide	641	Twiss, Douglas Frank	187
storage, of unvulcanized compounds	651	Unsaturated compounds, action on natural rubber in solution, of	74, 275
testing of Hevea latex	630	Vibration	
State of cure, modulus as measure of	439	characteristics of tread stocks	711
Static		mechanical, transmission through rubbers	517
exposure testing of automotive compounds	885	of	490
measurements of rubberlike materials	730	Viscoelasticity of rubber	
Statistical kinetics of Hevea rubber cyclization	784	lowering of rubber solutions	234
Stiffness of pure-gum vulcanizates	446	and vulcanizate stiffness	446
Storage		Vulcanization	
effect of, on molecular weight of milled rubber	91	accelerated sulfur	1
stability of unvulcanized natural, nitrile, and GR-S rubber compounds	651	of crepe rubber, rate of	48
Strain and modulus of vulcanizates	430	of rubber	36, 191, 204
Stress		and structure of polyacrylic rubber	582
constant, elongation tests	56	Vulcanizing characteristics of raw rubber	99
relaxation and aging resistance of rubber vulcanization	40	Water vapor permeability and sorption of Hevea latex films	1006
temperature studies of transitions in rubbers	468	Wear	
Stretching, rate of, on tensile strength	50	and abrasion of rubber	107
Stripping, speed of, effect of	391	road, of tires	656
Structural		X-ray analysis of the molecular structure of rubbers. X-ray diffraction of amorphous rubber	258
changes in butadiene rubbers	33	Zinc	
units of GR-S	21	ammonium compounds, action of complex	303
Structure		compounds, gelling of Hevea latex by	995
molecular, application of polarized infrared radiation to problems in	480	oxide stability of latex	641
of polyacrylic rubber	582	salt of mercaptobenzothiazole, heat sensitization of latex by	621
of vulcanizates loaded with carbon blacks	533		
Studies of the vulcanization of rubber	209		
and structure of polyacrylic rubber	582
